# 1. Installing NetBeans

- Your MAC needs to run OS X 10.7 (Lion) or a more recent version. [Find out the OS X version of your MAC.](#)
- Go to <http://www.oracle.com/technetwork/articles/javase/jdk-netbeans-jsp-142931.html>
- Click on “Accept License Agreement”.
- Download the file “jdk-8u151-nb-8\_2-macosx-x64.dmg” (see below)

The screenshot shows the Oracle Technology Network page for JDK 8u151 with NetBeans 8.2. The page has a red header with the Oracle logo and a navigation menu. A sidebar on the left lists various Oracle products, with 'Database' and 'Data Warehousing' circled and numbered 2 and 3 respectively. The main content area is titled 'JDK 8u151 with NetBeans 8.2' and contains a license agreement section with 'Accept License Agreement' and 'Decline License Agreement' buttons. Below this is a table of download links for various operating systems, with the 'Mac OS X x64' row highlighted. The table has columns for 'Product / File Description', 'File Size', and 'Download'. Below the table are links for 'License', 'Java SE 8 Readme', 'NB 8.2 3rd Party Readme', 'Installation Instructions', 'Java SE Release Notes', and 'NetBeans Release Notes'. At the bottom, there is a section for 'Java SE Development Kit 8u151 和 NetBeans IDE 8.2 复合软件包下载 (简体中文)' with links for '安装说明', 'Java SE 发行说明', and 'NetBeans 发行说明'.

Java SE and NetBeans Cobundle (JDK 8u151 and NB 8.2)		
Product / File Description	File Size	Download
Linux x86	295.39 MB	<a href="#">jdk-8u151-nb-8_2-linux-i586.sh</a>
Linux x64	290.35 MB	<a href="#">jdk-8u151-nb-8_2-linux-x64.sh</a>
Mac OS X x64	362.67 MB	<a href="#">jdk-8u151-nb-8_2-macosx-x64.dmg</a>
Windows x86	326.03 MB	<a href="#">jdk-8u151-nb-8_2-windows-i586.exe</a>
Windows x64	337.35 MB	<a href="#">jdk-8u151-nb-8_2-windows-x64.exe</a>

Figure 1. Downloading NetBeans for a MAC

- Find the file you downloaded on your computer and click on it to install.

#### Note

you might need administrator rights to install software on your MAC!

Now that we have NetBeans installed, let's add the Codename One plugin.

## 2. Adding the plugin "Codename One" to NetBeans

Open NetBeans. In the menu, select Tools → Plugins.

In the windows opening, select “Available plugins”.

Plugins can be listed alphabetically by clicking on the column “name”, that makes them easier to find.

- Search for “Codename One”.
- Select the Codename One plugin by ticking the box on the left.
- Click on “Install” and follow the instructions.

## 3. Restart NetBeans to finish the installation

Congratulations, you are ready to create your first mobile app!

## The end
